Project Overview

School District of Lee County is converting three middle schools from traditional programs to magnet programs that are appealing and challenging to attract and retain diverse populations of students. The Magnet Schools Assistance Program (MSAP)-funded schools combine art themes with rigorous academics to engage and challenge students by integrating creativity into logic, mathematics, and science. The MSAP schools facilitate family and community partnerships that embrace and support the arts and sciences and provide opportunities to prepare students for the future.

Grades 6-8
